Made in America **Lifetime Guarantee**

Thank you for purchasing this instrument from Intellitronix. We value our customers!

INSTALLATION GUIDE
LED Digital Clock
Part Number: M8009

*** Always disconnect the battery *before* attempting any electrical work on your vehicle.***

WIRING INSTRUCTIONS

Note: Automotive circuit connectors are the preferred method of connecting wires. However, you may solder if you prefer.

Ground - **Black** Connect directly to the engine block.

Power - **Red** Connect to a switched +12V source, such as the ignition.

Memory - **Pink** Connect directly to the battery to retain the time when the ignition is shut off.

Dimmer - **Purple** Connect to the parking lights to dim the LEDs 50% when the headlights are on. However, **do not** connect to the headlight rheostat control wire; the dimming feature will not work properly.

Once the gauge is wired in, program the time with the two separate push buttons for hours and minutes.
